Performance Impact: Each category directly affects user experience, search rankings, and business conversion rates.

Category	Score	Grade	Status	Business Impact
Performance	62/100	D	Needs Improvement	User Experience & SEO Rankings
SEO Optimization	95/100	A	<ul><li>Excellent</li></ul>	Search Visibility & Traffic
Security	100/100	A	<ul><li>Excellent</li></ul>	Data Protection & Trust
Accessibility	87/100	В	Good	User Inclusion & Legal Compliance
Design & UX	100/100	A	<ul><li>Excellent</li></ul>	User Engagement & Retention
Conversion	65/100	D	Needs Improvement	Revenue Generation & ROI

# **♦ Core Web Vitals 2025 Enhanced Analysis**

**Core Web Vitals Impact:** These Google ranking factors directly impact user experience, search visibility, and conversion rates. Performance optimizations here can significantly improve business metrics.

## **Progressive Web App Assessment**

Progressive Web App: App-like experience capability for enhanced user engagement and conversion

Not Ready - MISSING FEATURES

# **Performance Deep-Dive Analysis**

Metric	Value	Target	Status	Impact
Time to Interactive	11.15s	≤ 3.8s	<ul><li>Critical</li></ul>	User can interact with page
Speed Index	5.67s	< 3.4s	<ul><li>Critical</li></ul>	Visual loading progress
Total Blocking Time	37ms	≤ 200ms	<ul><li>Good</li></ul>	Main thread blocking
Interaction to Next Paint (INP)	360ms (Needs Improvement)	≤ 200ms	<ul><li>Critical</li></ul>	2025 Core Web Vital - User interaction responsiveness

# **Meta Tags Analysis**

Element	Status	Details	Recommendation
Title Tag	Present	Length: 60 characters	✓ Perfect length (60 chars) - Well optimized for search engines
Meta Description	Present	Length: 144 characters	▲ Short (144 chars) - Consider expanding to 150-160 characters
Open Graph Tags	Complete	OG:Title: ✓ OG:Description: ✓ OG:Image: ✓ OG:URL: ✓	! Add missing OG tags for better social sharing

#### **Content Structure**

Element	Status	Recommendation
H1 Tags	1	Should have exactly one H1 per page
H2-H6 Tags	10	Good hierarchical content structure

## **Schema Markup & Structured Data**

Schema Type	Status	Implementation	SEO Impact	Action Required
Organization Schema	▲ Missing	0 fields detected	Brand visibility, knowledge panels	Implement Organization schema
Article/Blog Schema	▲ Missing	None type	Rich snippets, featured content	Add Article schema for blog posts
Breadcrumb Schema	▲ Missing	0 levels detected	Search result navigation, UX	Implement breadcrumb navigation
Product/Service Schema	▲ Opportunity	0 products/services	Rich product snippets, pricing	Add Product/Service schema
Review/Rating Schema	▲ Missing	N/A avg rating	Star ratings in search results	Implement review schema system

# **Technical SEO & Search Engine Crawlability**

Technical Factor	Current Status	Details	Search Impact	Optimization Opportunity
Robots.txt Configuration	✓ Present	2 directives, 1 sitemap references	Crawl budget optimization	Review crawl directives
XML Sitemap	✓ Present	3 URLs, last modified: Recent	Indexation efficiency	Update sitemap frequency
Canonical URLs	✓ Implemented	Self-referencing: Yes	Duplicate content prevention	Audit canonical implementation
URL Structure	✓ SEO-Friendly	Length: 0 chars, Hyphens: No	Keyword relevance, user experience	Maintain clean URL structure
Mobile-First Indexing	✓ Mobile-Ready	Mobile score: 85/100	Primary ranking factor	Monitor mobile performance

# **Link Architecture & Authority Building**

# **Internal Link Analysis**

Total Internal Links	Unique Destinations	Anchor Text Diversity	Deep Link Ratio
99	79	100%	100%

#### **External Link Profile**

Outbound Links	NoFollow Ratio	Authority Domains	Link Safety Score
7	80%	2	100%

#### **Advanced Content & Semantic SEO**

Content Factor	Current Analysis	Optimization Score	Search Intent Match	Improvement Strategy
Semantic Keyword Coverage	0% topic coverage	\$0/100\$	Unknown	Expand related topics
Content Freshness	Last updated: Unknown	\$0/100\$	Current	Regular content updates
E-A-T Signals	Author info: Missing	\$0/100\$	Developing	Add author bios and credentials
Featured Snippet Optimization	0 opportunities found	Limited potential	Mixed	Create FAQ sections

#### **International SEO & Localization**

Localization Factor	Implementation Status	Coverage	Global Impact	Action Required
Hreflang Tags	▲ Not Implemented	0 languages	International search visibility	Implement for target markets
Geo-Targeting	▲ Not Set	Global	Local search rankings	<ul> <li>Set up Google Search Console geo- targeting</li> </ul>
Local Business Schema	▲ Missing	0% complete	Local pack rankings	Implement LocalBusiness schema

## **Advanced SEO Action Plan**

## **Technical Implementation**

- ✓ Implement comprehensive schema markup
- $\ensuremath{\boldsymbol{\nu}}$  Optimize robots.txt and XML sitemaps
- $\checkmark$  Set up proper canonical URL structure
- $\checkmark$  Enhance mobile-first optimization

## **Content Strategy**

- ✓ Develop semantic keyword clusters
- ✔ Create featured snippet-optimized content
- ✓ Strengthen E-A-T signals
- ${\it \checkmark}$  Implement regular content freshness updates

## **Authority Building**

- ✓ Optimize internal link architecture
- ✓ Build high-quality external links
- ✓ Implement international SEO strategy
- ✔ Develop local business optimization

Security Feature	Status	Risk Level	Description
HTTPS Encryption	<ul><li>Enabled</li></ul>	Low	Encrypts data transmission between browser and server
Security Headers	• 5 Present	Medium	HTTP headers that prevent common security attacks
Mixed Content	None detected	Low	HTTP resources loaded on HTTPS pages
SSL Certificate	<b>9</b> 0/100	Low	Certificate validity and configuration strength

# **3** Accessibility & Compliance

Issues Found	Severity	Impact
• 0 issues	Low	Screen reader compatibility
• 4 issues	High	Visual accessibility for low vision users
• 1 images	Medium	Screen reader image description
• 0 issues	Low	Form usability for assistive technology
	<ul><li>0 issues</li><li>4 issues</li><li>1 images</li></ul>	<ul><li>0 issues</li><li>4 issues</li><li>1 images</li><li>Medium</li></ul>

# ☆ Design, UX & Conversion

## **Design & User Experience**

Status	Score	Recommendation
• Excellent	100/100	Improve heading structure and content organization
Needs Improvement	70/100	Ensure consistent color usage and contrast
• Excellent	100/100	Optimize font sizes and readability
Good	85/100	Enhance mobile user experience
	<ul><li>Excellent</li><li>Needs Improvement</li><li>Excellent</li></ul>	<ul> <li>Excellent 100/100</li> <li>Needs Improvement 70/100</li> <li>Excellent 100/100</li> </ul>

# **Conversion Elements Analysis**

Element	Found	Quality	Optimization Opportunity
Contact Forms	0 forms	No forms found	Simplify form fields and add clear labels
Call-to-Action Buttons	7 CTAs	<ul> <li>Needs improvement</li> </ul>	Use action-oriented text and contrasting colors
Trust Signals	Present	<ul><li>Excellent</li></ul>	Add testimonials, certifications, and contact info
Value Proposition	Unclear	• \$0/100\$	Clearly communicate unique benefits and value

#### **WordPress Health Analysis**

**Overall Health Score** 

**75/100** 

**WordPress Version** 

6.8.2

**Active Theme** 

bb-theme

**Active Plugins** 

4

#### **WordPress Configuration Details**

Component	Analysis
Version & Core	● WordPress 6.8.2 • bb-theme
Plugin Ecosystem	• Active Plugins: 4 detected (bbpowerpack, contact-form-7, bb-plugin, yoast-seo)
Security Issues	• Exposed Files: wp-config.php, wp-admin/install.php, wp-includes/rss-functions.php
Performance Issues	<ul> <li>Unoptimized Images: WordPress images without responsive attributes: 16</li> </ul>
SEO Configuration	No Sitemap: No XML sitemap detected

#### **WordPress-Specific Recommendations**

- ✓ Security: Implement WordPress security best practices
- ✔ Block access to sensitive WordPress files
- ✔ Performance: Optimize WordPress for speed
- ✓ Implement responsive images and optimization

## **WordPress Security Best Practices**

- ✓ Keep WordPress core, themes, and plugins updated regularly
- ✓ Use strong passwords and enable two-factor authentication
- ✓ Implement security headers and SSL certificates
- ✓ Regular backups and security monitoring
- ${m arepsilon}$  Limit login attempts and hide wp-admin from unauthorized

# **(2)** Technical Quality Tests

Test	Status	Details
Google Analytics	Good	Google Analytics 4 (gtag) detected
Favicon	Good	Favicon found: apple-touch-icon, icon
Console Errors	Warning	Errors: 5   Warnings: 0. Basic validation found 5 potential JavaScript issues.
Social Media	warning	Platforms: 2   Open Graph: Yes. Partial social media integration: Found Open Graph tags, 2 social platform links but missing Twitter Cards.
Image Aspect Ratios	Warning	Images: 28 total, 1 with issues (3.6%). 1/28 images have aspect ratio or attribute issues (3.6%).
Inline CSS Analysis	Unknown	Elements: 0/0 with inline CSS (0%). Total Size: 0 characters. Inline CSS could not be checked.
HTML Page Size Analysis	Unknown	Size: 0.0KB   Elements: 0   Compression: 0.0%. Load Time Estimate: 0.0s on slow connections. HTML page size could not be checked.
DOM Structure Analysis	Unknown	Complexity Score: 0   Elements: 0   Max Depth: 0. Redundant Elements: 0   Performance Impact: unknown. DOM structure could not be analyzed.
HTML Compression Analysis	Unknown	Encoding: none   Original Size: 0.0KB   Compression: 0.0%. Potential Savings: 0.0KB   Transfer Time Saved: 0.0s. HTML compression could not be analyzed.

# **M** Competitive & Industry Analysis

#### **Performance Benchmarking**

Overall Score vs Industry	Performance Ranking	SEO Competitiveness
85/100 (Above average)	Poor	Highly Competitive

#### **Key Competitive Advantages to Pursue**

- ✔ Core Web Vitals Optimization: Improve loading speed to gain ranking advantage
- ✓ Mobile Performance: Optimize for mobile-first indexing and user experience
- ✓ Security Implementation: Build trust with HTTPS and security headers
- ✔ Accessibility Compliance: Expand market reach and meet legal requirements
- ✓ Conversion Rate Optimization: Maximize revenue from existing traffic

# ☑ ROI & Business Impact Projection

#### **Projected Business Benefits**

25%

Projected Traffic Increase
Within 3-6 months

35%

Conversion Rate Improvement Post-optimization \$5,000

Revenue Recovery Potential Annual projection 3-12x

Expected ROI Multiple On optimization investment

#### **Implementation Investment Analysis**

### Immediate Fixes (Week 1-2)

Technical implementation: 8-12 hours Security & performance: 4-6 hours Testing & validation: 2-3 hours

Total: 14-22 hours (Based on 0 critical issues found)

### **Strategic Improvements (Month 1-3)**

SEO optimization: 12-18 hours
UX improvements: 8-12 hours
Content optimization: 6-9 hours

Total: 26-40 hours (Complexity adjusted for 40 total issues)

Dynamic Cost-Benefit Analysis: Based on current issues, estimated investment of \$4,725-\$12,600 in optimization can yield \$23,625-\$78,750+ in annual revenue increase through improved search rankings, user experience, and conversion rates.

#### **Implementation Roadmap**

# Phase 1: Critical Fixes (Week 1-2)

Security headers implementation

Core Web Vitals optimization

Critical accessibility issues

Mobile responsiveness fixes

# Phase 2: SEO & Performance (Week 3-4)

Meta tags optimization

Image optimization

Content structure improvements

Technical SEO enhancements

# Phase 3: UX & Conversion (Week 5-6)

Design improvements

Conversion optimization

User experience enhancements

Analytics implementation

#### **Immediate Action Items (Priority 1)**

Action	Impact	Effort
Slow Loading Speed - First Contentful Paint	Critical	<ul><li>Medium</li></ul>
Slow Largest Contentful Paint (LCP)s	Critical	<ul><li>Medium</li></ul>
Images Not Optimized for Responsive Delivery	High	<ul><li>Medium</li></ul>
WordPress Security: Exposed Files	High	<ul><li>Medium</li></ul>
Slow Time to Interactive (TTI)	High	<ul><li>Medium</li></ul>

## Long-term Strategic Improvements (Priority 2)

- ☑ Enhance: Complete social media integration by adding: Twitter Cards
- Enhance: Review and optimize image dimensions, ensure all images have proper alt text and aspect ratios
- Enhance: Review optimization opportunities: minify HTML, reduce DOM complexity, optimize content structure
- Enhance: Review DOM structure optimization opportunities: reduce nesting, simplify element hierarchy, remove unnecessary containers
- Enhance: Enable responsive images and image optimization
- ☑ Enhance: Generate and submit an XML sitemap to search engines
- Maintain competitive advantage through continuous performance monitoring
- Explore advanced personalization and user experience enhancements
- Consider international SEO expansion if applicable to business goals
- Implement advanced security measures and compliance standards

# **(3)** Expected Return on Investment

**15-25%** 

CONVERSION RATE INCREASE

20-40%

ORGANIC TRAFFIC GROWTH

**10-30%** 

PAGE LOAD SPEED IMPROVEMENT

ROI estimates based on industry benchmarks and current performance gaps.

#### **Audit Summary**

Analysis Date: July 31, 2025 at 05:05 PM

Analysis Duration: 113.0 seconds Report Version: Professional v2.0

Next Recommended Review: 30-90 days

#### **Key Outcomes**

Overall Score: 85

Critical Issues: 0 identified

Revenue Impact: \$0 at risk

Improvement Potential: Moderate improvement potential

#### **Implementation Support Available**

Service	Description
✓ Technical Consultation	Expert guidance on implementation priorities
✓ Performance Monitoring	Ongoing tracking and optimization
✓ Training & Support	Team education and best practices
✓ Custom Solutions	Tailored optimization strategies

This comprehensive analysis provides data-driven insights for website optimization and business growth. Report data is based on automated testing and industry best practices. Results may vary based on implementation approach. For technical support and implementation assistance, please contact your audit provider.

Report generated using advanced website auditing technology • Data collected: July 31, 2025 at 05:05 PM • Valid for 30 days

#### **Professional Website Audit Report**

Generated on July 30, 2025 at 02:05 PM • Analysis Duration: 45.1 seconds

This comprehensive audit provides actionable insights for website optimization and business growth.
